英	Technical English is used for communicating complex information in science and technology. There are many different types of information that can be explained, such as: - Cause and Effect - Comparison and Contrast - Describing Figures and Graphs - Describing Objects and Processes, etc. All of these must be done as clearly and accurately as possible. This 8 week course will help students learn how to understand and describe in English different types of technical information that are important for their research.

学習の到達目標 Learning Objectives	
日	Learn how to understand and describe in English different types of technical information important for your research Learn how to describe Cause and Effect, Comparison and Contrast, etc. Learn how to describe objects and processes, etc. Learn how to describe figures and graphs

成績評価の方法及び基準 Grading Policy	
日	50% Weekly homework, based on submission. 50% Final examination, based on content. It is important to do homework so that you can practice what you studied and learn if you have any problems. 50% of your grade will depend on submitting your homework
英	50% Weekly homework, based on submission. 50% Final examination, based on content. It is important to do homework so that you can practice what you studied and learn if you have any problems. 50% of your grade will depend on submitting your homework to the instructor every week. The instructor will correct the homework and return it to the students, but he will not give a grade for the content. The final examination, however, will be graded for content.
